Bluesign system partners are responsible entities within the textile supply chain, committed to applying the bluesign system. By being a system partner, they adhere to a set of high standards aimed at ensuring the responsible use of resources, reducing environmental impact, and promoting safe working conditions throughout the supply chain.

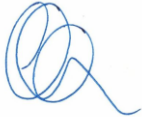

The bluesign system is an internationally recognized framework that helps companies implement clean chemicals, reduce waste and emissions, and make environmentally responsible choices. Partners benefit from bluesign's expert knowledge, which empowers them to deliver sustainable products that people can trust.

Chemical products that meet the bluesign criteria and carry the bluesign approved label must fulfill strict ecological and toxicological requirements. These products, along with system partners, are registered in the bluesign finder database.

Sustainability is central to the philosophy of bluesign system partners, and they are dedicated to acting responsibly within the industry to create safer and more sustainable products for end consumers. This confirmation is valid until March 31, 2026.
